Is this Food or Cosmetics Too Toxic to Use?

Go to the App Store and download the free Yuka app where the icon is:
You can learn more about this app at: https://yuka.io/en/

After installing the app on your smartphone:

1. Go to the app and select the scan icon at the bottom of the screen.
2. Hover it over the barcode to see the results of which rates from 0 to 100. The lower the number the higher the hazard. The level of hazardous is color coded where:
   a. **RED** = Hazardous
   b. **YELLOW** = Limited Risk
   c. **GREEN** = No Risk

3. Products resulting in Red or Yellow offer why under the **Negative** category. To see more Additive details, click the more information icon: ⓘ
4. Below the negative category is the list of **Positive** ingredients.
5. Scrolling downward to the "Recommendations" section will list a better substitute if the scanned product is rated Red or Yellow.
